

Nursery Curriculum Overview

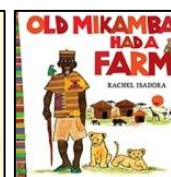

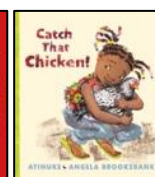

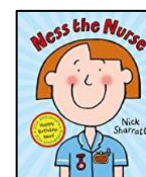

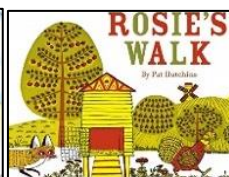

Spring Term

Up, down and all around and It's story time
Superheroes and Far, Far Away

Our focus this term: *Developing attention, communication, independence and early learning behaviours.*

Here are *some* of the books that we will be reading in the Spring Term with your child.

MAKING CONVERSATION

Children will listen to and talk about familiar stories, use story language in their play, express likes and dislikes and begin to speak in longer phrases and sentences.

MANAGING ME

Children will become increasingly independent in routines and self-care, practise taking turns and begin to recognise, name and manage their feelings with adult support.

MUSCLES AND MOVEMENT

Children will develop balance, coordination and control through outdoor play, simple games and obstacle courses, alongside activities that strengthen their hands and support early pencil control.

MARK MAKING AND MEANING

Children will practise recognising and writing their name, listen for initial sounds in words, explore rhyme and alliteration and retell familiar stories through talk, pictures and simple story maps.

MATHEMATICS

Children will count objects carefully, begin to understand that the last number counted tells us how many, recognise small quantities, explore numbers to 3 and investigate shape, size and simple patterns.

MY MARVELLOUS WORLD

Children will explore winter, ice and seasonal change, encounter celebrations such as Lunar New Year and Easter, investigate simple maps and learn about people and jobs in their community.
